

Perio Classifications Reboot

Incorporating RISK

with Allison Boone RDH

When: October 13, 2025

Time: 7 - 8:30pm

Where: Webinar (Zoom)

Further develop your confidence in classifying periodontal disease and incorporate discussions on risk in classifying patients and treatment planning.

Participants will revisit the updated periodontal classification framework and learn how to integrate risk-based thinking into their conversations with patients and treatment recommendations.

Through case-based discussion and evidence-informed strategies, you'll explore how to align your treatment recommendations with each patient's unique periodontal risk.

Key Topics:

- A review of the 2017 AAP Periodontal Classification
- Learn practical strategies on how to classify disease
- The role incorporating areas of risk in treatment planning and discussions with patients.
- Communication strategies to support patient understanding and engagement
