

A Team Approach to Implant Success!

Join this dynamic webinar to unite your dental team with essential implant knowledge and streamlined systems! Gain a clear overview of implant anatomy, components, types, materials, and osseointegration to enhance collaboration and communication. Drive long-term success by integrating thorough periodontal health assessments into pre-surgical planning and fostering early hygienist involvement. Empower comprehensive patient consent with education on peri-implantitis risks, the need for elevated homecare commitment, and recommended increased hygiene visits (every 3 months for the first year). Embrace a true team approach to proactive preparation and evidence-based guidance—delivering outstanding implant outcomes together!

Brandy Husted,
RDH, Passion U Faculty

Objectives

- Understand basic implant components, types, and integration to support team-wide communication and patient care.
- Recognize the critical role of periodontal health assessments before and during the implant process to prevent complications.
- Describe key patient education points on elevated home care needs, periodontal risks and the importance of frequent hygiene visits for informed consent.
- Apply team-based strategies for pre-surgical preparation and early follow-up scheduling to enhance implant outcomes.
