

Hygiene Case Study Club

Implementing PerioMonitor

Join Passion Dental Hygiene for a focused case-study discussion on implementing PerioMonitor™, the new saliva-based inflammation test introduced in our November 2025 webinar. This follow-up session reviews how the test works, what the results mean, and how it has influenced case acceptance, communication, and patient motivation in real clinical examples. Brandy and Allison will share team feedback and personal experiences, with plenty of time for open discussion. The primary focus will be on practical verbal skills—how to explain PerioMonitor findings, guide patients through an action plan, and integrate this tool into everyday periodontal care

Objectives

- Describe the basic principle, procedure, and interpretation of the PerioMonitor™ saliva-based oral inflammation test.
- Recognize the potential value and limitations of PerioMonitor compared to traditional periodontal assessment methods.
- Analyze real-world case studies to understand how PerioMonitor results can impact patient communication, case acceptance, motivation, and treatment planning.
- Demonstrate effective communication strategies to explain PerioMonitor results to patients and collaboratively develop an evidence-based action plan.

Brandy Husted, RDH

Allison Boone, RDH

Monday, June 15th 2026
from 7 - 8:30pm MST
via Zoom.
