

Prep, Scan, Design, Deliver

Mastering Digital Indirect Restorations

This clinically focused course walks through the complete indirect restorative workflow in the digital age—from preparation and scanning to design, materials, and cementation. Participants will explore how to integrate digital impressions, communicate effectively with digital labs, and leverage chairside design for same-day crowns where appropriate. Practical guidelines for preparation parameters, core build-ups, and restoring endodontically treated teeth will be emphasized, along with a clear review of material selection and cementation protocols to maximize longevity and predictability.

Dr. Mike Parchewsky, DMD

As the Chief Clinical Officer at Passion Dental Group, Dr. Mike Parchewsky is a leader in digital dentistry and implantology. With a DMD from the University of Saskatchewan and an OMFS Fellowship from Albert Einstein College of Medicine, he mentors for Dentsply Sirona and Atlantis and serves as Director of Clinical Protocols for OraQ AI software. An international lecturer and co-founder of Digital Work-flow Dentistry, he also consults on tech and healthcare systems

Objectives

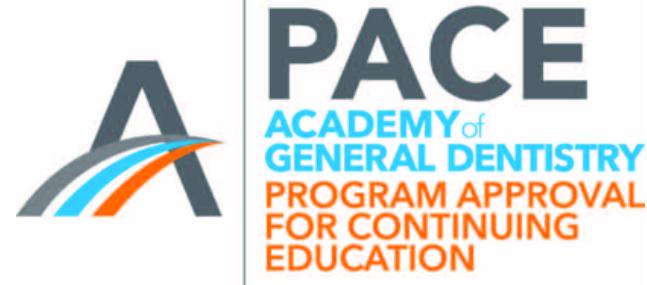

- Plan and execute appropriate preparation designs
- Utilize digital impressions and digital lab workflows
- Apply chairside design principles
- Differentiate core build-up approaches and
- Select indirect restorative materials and cementation protocols
