

Evidence-Based Strategies and Innovative Solutions for Today's Dental Team

with **Leanna Enstrom BPE, RDH, COM**

This course will help clinicians recognize ergonomic risk factors in both their operatory setup and daily work habits that can contribute to pain, discomfort, and musculoskeletal injuries. Participants will learn the principles of proper ergonomic positioning and aligned posture, along with practical strategies and solutions to create a safer, more efficient clinical environment. By applying these techniques, clinicians can reduce physical strain, improve overall well-being, and support long-term career longevity.

**Monday, November 16th, 2026
7-8:30 PM MST**

On-line (Zoom)

LEARNING OBJECTIVES

- Review and discuss current research and evidence-based practices in dental ergonomics.
- Recognize common risk factors for work-related musculoskeletal disorders affecting dental professionals.
- Identify and implement ergonomic solutions that support clinician health, comfort, efficiency, and career longevity within the dental practice setting.
