The Regenerative Edge

Advanced Bone Grafting for Implant Success

Successful implant dentistry starts with a solid foundation. This hands-on, one day course takes you through the principles of guided bone regeneration (GBR) and biologic graft materials for predictable repair of bone defects.

LEARNING OBJECTIVES

- Assess bone morphology.
- Plan grafting around restorative needs.
- Master the surgical techniques that make regeneration predictable - flap, design, release, suturing, and membrane management.
- Hands-on GBR, flap design and suturing on pig jaw.

Dr. Michael Parchewsky
DMD, FAGD

As the Chief Clinical Officer at Passion Dental Group, Dr. Mike Parchewsky is a leader in digital dentistry and implantology. With a DMD from the University of Saskatchewan and an OMFS Fellowship from Albert Einstein College of Medicine, he mentors for Dentsply Sirona and Atlantis and serves as Director of Clinical Protocols for OraQ AI software. An international lecturer and co-founder of Digital Workflow Dentistry, he also consults on tech and healthcare systems.

Dr. Michael Mah
DMD

Dr. Mah is a born and raised Albertan. He completed his BSc at the U of A, and his Business Masters and DMD at University of British Columbia. He did further surgical training at Lincoln Hospital in Bronx NY. He works in the trenches and grind of general dentistry just like his students and understands the need for creating and fostering a relational approach to his profession. Implantology is his main passion, and he is a KOL for Hiossen Implants and Faculty at Passion U. His practice is surgical based, and he places approximately 300 fixtures a year.
